

Johann's Specialists

Captain Johan Ernst and his crack team are known in the black company as “The Specialists”. They are tasked with missions for the that require a scalpel rather than a hammer. The gunners lead by Feldweibel Lukas Gorling harass and search for an open way to the objective. Meanwhile the Captain’s bodyguard cuts through the enemy with sweeps of his greatsword and the captain backs him up and looks for openings to accomplish their purpose and get out.

Johann's Specialists

With a command range of 6 and 6 virtue Captain Johann can coordinate actions and serve as a strong reserve of virtue to fuel his bodyguards actions. His 3 actions also mean he is capable of keeping up with the Doppelsoldner or spend actions rallying. Andreas' Greatsword means that he has 6 faith while in combat, this combined with his Death's Dance card allow him to single handed put out a great deal of attacks to remove enemies. The Feldweibel can command the gunners using them for flanking actions towards the objective or for effective fire. If he sticks close to the captain he can also rally for the captain, rerolling 1s. The gunners can also put out an excellent rate of fire with their "Trained to Gun" card. However you will need to be careful to keep the captain alive and unengaged and not be overwhelmed by enemies.
